# Advisory Committee on Qualifications for Health Care Translators and Interpreters 2014 Report

Recommendations in Response to the Qualifications for Health Care Translators and Interpreters Legislative Charge and for the 84<sup>th</sup> Legislature, Regular Session, 2015

August 27, 2014

# **DISCLAIMER**

This Advisory Committee on Qualifications for Health Care Translators and Interpreters (Committee) Report 2014 reflects the views and opinions of a majority of the Committee's membership. The Committee, for purposes of this report, refers only to those members appointed to the Committee by the Health and Human Services Commission's (HHSC) Executive Commissioner and does not include the non-voting representatives from each Texas Health and Human Services (HHS) agency. Unless otherwise noted, the views and opinions expressed in these recommendations are those of the appointed members of the Committee. HHSC only provides staff support as directed by Health and Human Services Circular C-022, Enterprise Policy for Advisory Committees.

This report and its recommendations for the Committee's legislative charge per H.B. 233, 81<sup>st</sup> Legislature, Regular Session, 2009, reflect the positions of a majority of the members of the Committee. There are many different perspectives and policy concerns represented by the Committee's membership and not all statements made in this report reflect each member's official position. Contents of this report were discussed by the Committee and every member voted on the recommendations independently and by unanimous vote at a regular meeting and there were no nay votes and no abstentions.

# ADVISORY COMMITTEE ON QUALIFICATIONS FOR HEALTH CARE TRANSLATORS AND INTERPRETERS LEGISLATION RECOMMENDATIONS

The appointed members of the Advisory Committee on Qualifications for Health Care Translators and Interpreters (Committee) focused on increasing the quality of and access to health care by improving the quality of communication between health care providers and consumers with limited English proficiency (LEP) and consumers who are deaf or hard of hearing. There are separate recommendations for foreign languages and American Sign Language. The Committee respectfully submits these recommendations, which were adopted by unanimous vote.

# Recommendations for Interpreters of Foreign Languages and Foreign Signed Languages

## **Recommendation #1**

Prohibit the practice of requiring patients to bring their own interpreters in health care settings.

## **Rationale for Recommendation #1**

This recommendation addresses one of the most clinically inappropriate practices of health care providers and institutions related to language access. It prohibits the practice of asking patients to bring their own interpreters in health care settings. According to federal guidance regarding discrimination against LEP individuals, health care providers or institutions that receive federal funds may not require LEP individuals to use family members or friends as interpreters.<sup>1</sup>

#### Recommendation #2

Limit the use of uncertified or unqualified individuals to assist with communication—including but not limited to friends, family members, associates, and others—to those medical emergency situations—both physical and mental health emergencies—in which an interpreter not associated with the patient is not available by any other means, including, but not limited to, in-house, contracted, and remote interpreters.

<sup>&</sup>lt;sup>1</sup> HHS Guidance to Federal Financial Assistance Recipients Regarding Title VI Prohibition against National Origin Discrimination Affecting Limited English Proficient Persons. Federal Register: August 8, 2003 (Volume 68, Number 153).

In routine situations, a provider will use a certified or qualified interpreter not associated with the patient at no cost to the patient. The health care facility staff will inform the patient—in the patient's preferred language—that a certified or qualified interpreter will be provided at no cost to the patient.

# Definition:

Remote interpreters shall be defined as certified or qualified interpreters who make their services available via communications technologies, such as telephone interpreting or web-based videoconferencing systems.

#### **Rationale for Recommendation #2**

The recommendation is a first, essential step toward increasing the quality of, and access to, competent medical interpreters. While certification is not currently required for foreign language interpreters in a medical setting, this recommendation in no way limits the possibilities of requiring medical specialty certification at a future date.

According to the federal Department of Health and Human Services, "... Family members (especially children) or friends may not be competent to provide quality and accurate interpretations. Issues of confidentiality, privacy, or conflict of interest may also arise. LEP individuals may feel uncomfortable revealing or describing sensitive, confidential, or potentially embarrassing medical, law enforcement (e.g., sexual or violent assaults), family, or financial information to a family member, friend, or member of the local community. In addition, such non-professional interpreters may have a personal connection to the LEP person or an undisclosed conflict of interest, such as the desire to protect themselves or another perpetrator in a domestic violence matter."

"...Competency requires more than self-identification as bilingual. Some bilingual staff and community volunteers, for instance, may be able to communicate effectively in a different

language when communicating information directly in that language, but not be competent to interpret in and out of English..."<sup>2</sup>

#### **Recommendation #3**

Require qualifications and successful completion of HHS agency approved training as set out below for any individual in the state of Texas who provides interpreting services as part of his or her professional duties in a health care setting.

Recommend the following interpreter qualifications:

- Certification by the Certification Commission for Healthcare Interpreters (CCHI) or the National Board of Certification for Medical Interpreters (NBCMI),
- **Or** all of the following:
  - Age 18
  - High School Education
  - Fluency in English and a Language Other Than English
  - Experience as a Translator or Interpreter in a Health Care Setting
  - Training in:
    - Interpreting Skills
      - Consecutive Interpreting
      - Sight Translation
      - Protocols (managing the session)
    - •• Code of Ethics for Health Care Interpreters
    - Standards of Practice for Health Care Interpreters
    - •• Roles of the Health Care Interpreter
    - Cultural Awareness
    - •• Legislation and Regulations (Americans with Disabilities Act (ADA), Section 504 of the Rehabilitation Act, Title VI of Civil Rights Act, Health Insurance Portability and Accountability Act (HIPAA), Health Information Technology for Economic

4

<sup>&</sup>lt;sup>2</sup> HHS Guidance

and Clinical Health Act (HITECH), National Standards on Culturally and Linguistically Appropriate Services (CLAS))

# • General Medical Knowledge

- Anatomical Terms for Major Body Systems
- Medical Tests and Diagnostics
- o Common Specialties and Medications (including physical and mental health)
- Acronyms and Abbreviations
- o Routine Medical Equipment
- Health Care Compliance Training (for example, Infection Control, Emergency Codes, HIPAA)
- Onsite Mentoring
- Mental/Behavioral Health
  - o Common disorders of adults, children/adolescents
  - Common Medications
  - Psychiatric Tests and Diagnostics
  - Treatment Plans
  - Acronyms and Abbreviations
  - Legal Status (Voluntary, Peace Officer Emergency Commitment (POEC),
    Order of Protective Custody (OPC))

An HHS agency shall have authority to establish, by rule, the minimum standards for approved training and qualifications. See Appendix B.

#### **Rationale for Recommendation #3**

This recommendation ensures that medical interpreters in the state of Texas have a comprehensive knowledge of the medical, professional, and legal issues required for this role. In passing this recommendation, the Committee assumes that training will be approved by either a state health agency or a professional health care or interpreters' association. The Committee recommends for this purpose the National Code of Ethics and Standards of Practice developed by the National Council on Interpreting in Health Care (NCIHC). By granting rulemaking authority to an HHS agency, the need to seek further legislation on this issue is averted.

## **Recommendation #4**

Establish a registry of health care interpreters who meet the qualifications established by an HHS agency. This registry may also include language service organizations that provide health care interpreting services.

## **Rationale for Recommendation #4**

Health care providers who try to comply with language access requirements often have difficulty finding interpreters when needed, especially for languages of limited diffusion. In testimony before the Committee, stakeholders expressed strong support for a registry where they could easily find the interpreters they need. By relying on a nonprofit professional organization to host the registry, the State will avoid the cost of setting up and staffing a registry and the cost of registering will be very minimal. This approach is modeled after the longstanding Registry of Interpreters for the Deaf (RID). Registration will be voluntary, as a first step toward identifying and communicating with individuals who provide interpreting services in health care as stakeholders in the process of establishing qualifications.

## **Recommendation #5**

Patient liaisons/advocates working as interpreters should refrain from advocating *during* the interpreting session.

## **Rationale for Recommendation #5**

This recommendation ensures that advocates separate and clearly indicate when acting as interpreter or patient liaison, as addressed in the NCIHC standards of professional conduct. As part of the treating team, advocates are exposed to in-depth private health information about the patient and must discuss this with people outside of the treatment team for conflict-resolution purposes. When acting as an interpreter, the advocate may gain additional knowledge about a specific patient, information that was not disclosed to the interpreter when acting as an advocate.

The interpreter should be very careful not to disclose this information with people outside the treating team. Treating team means all health care providers involved in the care of a particular patient within a single facility. When in a dual role, the interpreter should be very clear about both of his/her roles and make sure that other people know at all times when he/she is acting as one or the other in order to avoid confusion.

#### **Recommendation #6**

Implement quality assurance measures for translation of written documents. The translation should be reviewed and edited by an experienced editor with the following criteria in mind:

- Reliability meaning of original text is clearly conveyed in new language
- Completeness nothing is omitted or added to the original message
- Accuracy text is free of spelling and grammatical errors
- Cultural appropriateness message is meaningful and appropriate for the target culture

## **Rationale for Recommendation #6**

This recommendation provides guidance to health care providers who seek translation services by describing translation standards and protocols with which providers may be unfamiliar and setting out qualifications for both in-house and outsourced translation providers.

A request for translation should include the following information:

- Function, overall purpose, and end use of the source text
- Description of target audience for translated text literacy level, cultural concepts,
  regional language variations
- Specific needs and special requirements, such as adaptation for low literacy level or specific terminology preferences
- Specific deadline by which the document is required

The translator should meet the following qualifications:

- Ability to read and write at a professional level in the source and target language
- Knowledge and experience with the culture of the intended audience

- Knowledge of medical terminology and concepts
- Experience as a medical translator

The translation function may be outsourced. If so, the committee recommends the following criteria to ensure the translation provider:

- Offers transparency in its processes
- Uses up-to-date technology and tools (including translation memory)
- Uses HIPAA and HITECH compliant security measures
- Includes editing, proofreading, language localization, and formatting as steps in its process
- Has mechanisms for Quality Assurance / Quality Control (such as ISO Certification) which specifies requirements for a quality management system.

# Recommendations for American Sign Language Interpreters

## **Recommendation #1**

Prohibit the practice of requiring patients to bring their own interpreter in health care settings.

## **Rationale for Recommendation #1**

This recommendation addresses one of the most clinically inappropriate practices of health care providers and institutions related to language access. It prohibits the practice of asking patients to bring their own interpreter in health care settings. According to federal guidance regarding language and communication discrimination, health care providers or institutions who receive federal funds may not require the use of family members or friends as interpreters.<sup>3</sup>

# **Recommendation #2**

Limit the use of uncertified and unqualified individuals to assist with communication—including but not limited to friends, family members, associates, and others—to those medical emergency situations—both physical and mental health emergencies—in which an interpreter not associated with the patient is not available by any other means, including, but not limited to, in-house, contracted, and remote interpreters.

In routine situations a provider will use a certified and qualified interpreter not associated with the patient at no cost to the patient. The health care facility staff will inform the patient—in the patient's preferred language—that a certified and qualified interpreter will be provided at no cost to the patient.

HHS Guidance		

Definition:

Remote interpreters shall be defined as certified and qualified interpreters who make their services available via communications technologies, such as web-based videoconferencing systems.

## **Rationale for Recommendation #2**

The recommendation is a first, essential step toward increasing the quality of, and access to, competent medical interpreters and in no way limits the possibilities of requiring medical specialty certification at a future date.

According to the Americans with Disabilities Act (ADA), Title II Technical Assistance Manual:

"In many situations, requiring a friend or family member to interpret may not be appropriate, because his or her presence at the transaction may violate the individual's right to confidentiality, or because the friend or family member may have an interest in the transaction that is different from that of the individual involved. The obligation to provide 'impartial' interpreting services requires that, upon request, the public entity provide an interpreter who does not have a personal relationship to the individual with a disability....Signing and interpreting are not the same thing. Being able to sign does not mean that a person can process spoken communication into the proper signs, nor does it mean that he or she possesses the proper skills to observe someone signing and change their signed or finger spelled communication into spoken words."

According to the Americans with Disabilities Act, Title III Regulations, 28 CFR 36.303(c) Effective Communication:

- (2) A public accommodation shall not require an individual with a disability to bring another individual to interpret for him or her.
- (3) A public accommodation shall not rely on an adult accompanying an individual with a disability to interpret or facilitate communication, except--
  - (i) In an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no interpreter available; or

<sup>&</sup>lt;sup>4</sup> ADA Title II Technical Assistance Manual Covering State and Local Government Programs and Services, Section II-7.

- (ii) Where the individual with a disability specifically requests that the accompanying adult interpret or facilitate communication, the accompanying adult agrees to provide such assistance, and reliance on that adult for such assistance is appropriate under the circumstances.
- (4) A public accommodation shall not rely on a minor child to interpret or facilitate communication, except in an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no interpreter available.

# **Recommendation #3**

Require qualifications and successful completion of HHS agency approved training as set out below, for any individual in the State of Texas who provides interpreting services as part of his or her professional duties in a health care setting.

Recommend the following interpreter qualifications:

- Sign Language Certification recognized by the Department of Assistive and Rehabilitative Services (DARS)
- Experience as an Interpreter in a Health Care Setting
- Training in:
  - •• Interpreting Skills
    - o Consecutive and Simultaneous Interpreting
    - Sight Translation
    - o Protocols (managing the session)
  - •• Code of Ethics for Health Care Interpreters
  - •• Standards of Practice for Health Care Interpreters
  - •• Roles of the Health Care Interpreter
  - Cultural Awareness
  - •• Legislation and Regulations (ADA, Section 504 of Rehabilitation Act, Title VI of Civil Rights Act, HIPAA, HITECH, CLAS)

# • General Medical Knowledge

- o Anatomical Terms for Major Body Systems
- Medical Tests and Diagnostics
- o Common Specialties and Medications (including physical and mental health)
- Acronyms and Abbreviations
- o Routine Medical Equipment
- Health care Compliance Training (for example, Infection Control, Emergency Codes, HIPAA)
- Onsite Mentoring
- Mental/Behavioral Health
  - o Common disorders of adults, children/adolescents
  - Common Medications
  - Psychiatric Tests and Diagnostics
  - Treatment Plans
  - Acronyms and Abbreviations
  - Legal Status (Voluntary, POEC, OPC)

An HHS agency shall have authority to establish, by rule, the minimum standards for approved training and qualifications. See Appendix B.

#### Rationale for Recommendation #3

This recommendation ensures that medical interpreters in the state of Texas have a comprehensive knowledge of the medical, professional, and legal issues required for this role. Additionally, this recommendation ensures effective communication with deaf and hard-of-hearing individuals in any health care setting. In passing this recommendation, the Committee assumes that training will be approved by either a state health agency or a professional health care or interpreters' association. The Committee recommends for this purpose the National Code of Ethics and Standards of Practice developed by the NCIHC. By granting rule-making authority to an HHS agency, the need to seek further legislation on this issue is averted.

# **Recommendation #4**

Establish a registry of health care interpreters who meet the qualifications established by an HHS agency. This registry may also include language service organizations that provide health care interpreting services.

# **Rationale for Recommendation #4**

Health care providers who try to comply with language access requirements often have difficulty finding interpreters when needed, especially for languages of limited diffusion. In testimony before the Committee, stakeholders expressed strong support for a registry where they could easily find the interpreters they need. DARS currently hosts a similar registry of qualified interpreters. This recommendation would expand the existing registry to include interpreters specifically qualified for health care settings.

## APPENDIX B

# PROCEDURES FOR ACCREDITATION, QUALIFICATION, CERTIFICATION, AND RENEWAL

# REQUIREMENTS FOR TRAINING PROGRAM ACCREDITATION AND RENEWAL

## PROGRAM ACCREDITATION REQUIREMENTS

Programs may apply to provide the following training for health care interpreters, translators, and/or instructors:

Certification course

Minimum of 80 hours of instruction led by a qualified instructor (see page B-2) in the following core competencies:

- Interpreting skills
- o Code of ethics and standards of practice for health care interpreters
- o Roles of the health care interpreter
- o Cultural awareness
- Legislation and regulations
- o General medical knowledge
- o Basic mental/behavioral health terminology
- o Routine medical equipment
- Health care compliance training (for example, infection control, emergency codes, HIPAA)
- Mentoring

Minimum of 40 hours of health-care-related mentoring by a qualified health care interpreter. Mentoring will be structured following the standards of practice and rating scale of the International Medical Interpreters Association (IMIA).

- Continuing Education
  - Focus on one or more of the core competencies
- All three Certification course, Mentoring, and Continuing Education
- Cost: Nominal fee

# **ADDITIONAL REQUIREMENTS**

- Retain an accurate record of each person's attendance and participation for five years from the date of their completion of the training program
- Retain documentation of qualifications of all instructors, including primary, assistant, and subject matter expert instructors
- Evaluate training or the acquisition of knowledge and mastery of skills by the individual
- Report graduation numbers to HHS agency
- The following must be submitted to the designated HHS agency with application:
  - o Signed and dated application with all information completed
  - o List of qualified instructors (See Instructor Qualification)
  - Training information including registration and enrollment, cost, frequency, and language(s)

- Sample attendance record
- Description of Evaluation Methods
- o Course information by competency area
  - Course syllabus
  - Learner-centered objectives
  - Teaching methodology

# RENEWAL REQUIREMENTS

A training program certificate must be renewed every two years to provide updated information. Cost: Nominal fee

## **EXPIRED CERTIFICATE**

To renew an expired certificate, a program must provide updated information.

Cost: Nominal fee

# REQUIREMENTS FOR INSTRUCTOR QUALIFICATION

# PRIMARY INSTRUCTOR QUALIFICATIONS

- Bachelor's Degree or Foreign Equivalent
- Proficiency in English and at least one other language
- Certification by CCHI or NBCMI or Sign Language Certification recognized by the Department of Assistive and Rehabilitative Services (DARS)
- Affiliation with a program accredited by the designated HHS agency or

Certified Medical Interpreter Educator by the International Medical Interpreters Association (IMIA)

Or

At least 500 cumulative hours instructing or training individuals providing health care interpreting or translation in the previous six years. Experience will be verified with the contact(s) noted in the application.

## ASSISTANT INSTRUCTOR OR SUBJECT MATTER EXPERT QUALIFICATIONS

- Teaching under supervision of the primary instructor
- Qualifications determined by primary instructor or training program

# REQUIREMENTS FOR HEALTH CARE INTERPRETER CERTIFICATION AND RENEWAL

# **CERTIFICATION REQUIREMENTS**

- Copy of interpreter certification documentation for one of the following:
  - o For sign language interpreters:

- Sign Language Certificate for health care interpreting at the level recommended by the Texas Department of Assistive and Rehabilitative Services (DARS) BEI
- o For spoken language interpreters:
  - Certification by the Certification Commission for Health Care Interpreters (CCHI)

or

National Board of Certification for Medical Interpreters (NBCMI)

or

- Completion of an 80-hour competency-based health care interpreter training program (in classroom or online) accredited by the designated HHS agency plus
- Practicum (onsite mentoring) of 40 hours
- Signed and dated application with all information completed
- Photo
- Training certificate of completion (if applying based on completion of a competency-based training program accredited by the designated HHS agency)
- Documentation of oral proficiency in English and a foreign language:
- One of the following:
  - o Bachelor, Master, PhD, or any other degree from an institution of higher education where the target language is spoken
  - o Graduation from a high school of the country where the target language is spoken
  - o 24+ semester college credit hours of the target language
  - ACTFL Oral Exams (American Council on the Teaching of Foreign Languages): 3.5 + /Advanced Mid Level (see <a href="https://www.actfl.org">www.actfl.org</a>)
- Cost: Nominal fee

# RENEWAL REQUIREMENTS

- Certificate expires two years from the issue/renewal date
- 16 contact hours of continuing education every two years including the following:
  - o A minimum of four hours must be related to ethics in health care
  - o Up to 10 hours may be satisfied through verifiable independent self-study and participation in non-certified training that relates to one or more of the core competencies
- Cost: Nominal fee

## **EXPIRED CERTIFICATE**

To renew a certificate expired for one year or less, complete the required continuing education and submit the Application for Certificate Renewal.

Cost: Nominal fee

A certificate expired for more than one year requires a new application.
